

# Sol Kim

yeseol.kim@proton.me | +1 778 689 3768 / +82 10 3906 3768 | Vancouver, BC / Seoul, Korea

## HIGHLIGHTS

---

- Full-stack developer with experience building and maintaining production web applications using Next.js, TypeScript, Node.js, and PostgreSQL.
- Optimized geospatial applications handling 20,000+ farmland plots using Google Maps API, deck.gl, and caching.
- Experienced in taking features from requirements and database design through implementation, deployment, and ongoing maintenance.

## TECHNICAL SKILLS

---

- **Languages:** JavaScript, TypeScript, SQL
- **Frontend:** React, Next.js, React Native, Tailwind CSS
- **Backend:** Node.js, Express.js, Next.js Route Handlers, REST APIs
- **Database:** PostgreSQL
- **DevOps & Tools:** Git, Gitea Actions, PM2, Azure Blob Storage

## WORK EXPERIENCE

---

### Korea Expert – Full Stack Developer

Dec 2025 – Present

Seoul, South Korea (on-site)

- Developed an internal HR management system using Next.js, TypeScript, and PostgreSQL, working from requirements and database design through implementation.
- Developed **REST API endpoints** using Next.js Route Handlers.
- Designed and managed **PostgreSQL** database schemas for HR management data.
- Implemented JWT authentication using HttpOnly cookies and role-based access control for user permissions.
- Set up **CI/CD deployment** using Gitea Actions and configured **PM2** for application deployment and process management on an internal server.

### Thanks Carbon - Front-End Developer

Jul 2025 – Sep 2025

Seoul, South Korea (Hybrid)

- Developed production web applications using **Next.js, TypeScript**, and **Firebase Auth**, implementing user-facing features based on complex business workflows.
- Implemented geospatial data visualization for 20,000+ farmland plots using **Google Maps API and deck.gl**, handling large datasets in a browser-based application.
- Optimized application performance through caching and reusable components, reducing page load time by approximately 40%.

## PROJECTS

---

### Four Season - Full-Stack Developer

Dec 2024 – Jan 2025

- Built a full-stack booking system for a small business in Vancouver using **Next.js, TypeScript, Strapi**, and **PostgreSQL**.
- Implemented real-time seat availability and booking logic and automated booking confirmations using the Resend API.

**Beep / Front-End Developer**

Sep 2024 – Dec 2024

- Developed a mobile safety application using **React Native and Expo**, implementing camera and image upload features, map-based incident reporting, and location pins.
- Implemented SOS alerts and GPS location sharing via SMS, allowing users to share their current location with emergency contacts.

**Stuff N Stuff - Full-Stack Developer / Project Manager**

Apr 2024 – May 2024

- Built a marketplace web application using **Express.js, EJS, and PostgreSQL**, designing the database and implementing most of the pages as Project Manager.
- Implemented a product recommendation feature based on user click history, counting clicks by product category and name to recommend relevant products.

**EDUCATION**

---

**British Columbia Institute of Technology, Canada** — Diploma, Full Stack Web Development (Sep 2023 – Jun 2025)**Hongik University, Korea** — B.A. Business Management (Mar 2017 – Feb 2020)
